Fourth Grade Exit Tickets
Cluster 7 – NC.NF.3 #1

1. Find the sum

$\frac{1}{5}+\frac{3}{5}=$ 4/5

$\frac{1}{5}+\frac{1}{5}+\frac{1}{5}+\frac{1}{5}=\frac{4}{5}$

2. Which of the following addition equations has a value of $\frac{6}{8}$?

a. Three fourths + three fourths $\frac{3}{4}+\frac{3}{4}$
b. Four eigths + two eigths $\frac{4}{8}+\frac{2}{8}$
c. Six thirds + six fifths $\frac{6}{3}+\frac{6}{5}$
d. One eigth + six eigths $\frac{1}{8}+\frac{6}{8}=\frac{7}{8}$

3. Find the difference

$\frac{2}{3}-\frac{1}{3}=$ 1/3

$\frac{1}{3}+\frac{1}{3}-\frac{1}{3}$ $2-1=1$

4. Caroline, Charlotte, and Harper bought flowers to plant in their garden. Carolina planted $\frac{2}{8}$ of the flowers. Charlotte and Harper planted the rest of the flowers, and they each planted the same amount.

- What fraction of the flowers did Charlotte and Harper plant together? 6/8

$\frac{8}{8}-\frac{2}{8}=\frac{6}{8}$

$\frac{6}{8}$ / \ $\frac{3}{8}$ $\frac{3}{8}$

- Write an equation to show the fraction of flowers that Caroline, Charlotte, and Harper planted together.

$\frac{2}{8}+\frac{3}{8}+\frac{3}{8}=\frac{8}{8}$

1. Find the sum

$\frac{1}{5}+\frac{3}{5}=$ _____

2. Which of the following addition equations has a value of $\frac{6}{8}$?

a. Three fourths + three fourths
b. Four eigths + two eigths
c. Six thirds + six fifths
d. One eigth + six eigths

3. Find the difference

$\frac{2}{3}-\frac{1}{3}=$ _____

4. Caroline, Charlotte, and Harper bought flowers to plant in their garden. Carolina planted $\frac{2}{8}$ of the flowers. Charlotte and Harper planted the rest of the flowers, and they each planted the same amount.

- What fraction of the flowers did Charlotte and Harper plant together?

- Write an equation to show the fraction of flowers that Caroline, Charlotte, and Harper planted together.
